

## IF I WAS PREMIER FOR DAY I WOULD....

- ❖ Start a tax on people who own three or more licensed cars on the road. Take the money from the tax and use it to fund the health system and clean energy.
- ❖ Make logging natural forests illegal and put heavy tax on plantations. The money from this tax I would put towards tourism and promoting Tasmania as the logging free state. Also I would upgrade the states railway system to take pressure off the roads.

That is what I would do if were premier for a day.
